

## Natural Vaseline Type C

### PROPERTIES

**Natural Vaseline Type C** is composed predominantly of Medium Chain Triglycerides and wax esters. This unique composition associates healing properties to a lubricating skin feel that makes it a natural alternative to petroleum jelly.

**Natural Vaseline Type C** maintains the natural chemical balance of the skin and aids immune system function by protecting the skin from external aggression

It also helps to protect the body from harmful free radicals that promote premature ageing and degenerative diseases.

**Natural Vaseline Type C** is ideal for all skin types due to its non-irritant, non-toxic and non-allergic characteristics.

Due to the predominance of Lauric and myristic acid **Natural Vaseline Type C** is highly stable against oxidation.

**Natural Vaseline Type C** melts readily on skin contact and offers a significant slippery and shiny effect. It provides a skin protective film of a non-occlusive type. It soothes the skin and improves skin appearance.

**Natural Vaseline Type C** supports elasticity by providing greater permanence on skin or lip surface.

**Natural Vaseline Type C** can be used to treat a wide variety of skin problems. By creating a thin film it helps tissue healing and repair, prevents wrinkles, sagging and age spots.

**Natural Vaseline Type C** also enhances sunscreen action with its water repellent properties. Due to its anti-microbial activity, **Natural Vaseline Type C** also has an action on hair scalp and dandruff control.
